

24021- Llangollen Museum, Parade Street, Llangollen, LL20 8PW

Rev A- 15.05.24

Green Infrastructure Statement

The proposal are for the replacement of the existing poor quality roof and covering which is currently failing and damaging the building.

The proposals do not increase the amount of surface water run off from the proposed alterations and the surface water will tie into the existing surface water solution of the site.

There is no loft and the existing felt roof covering is such that there are no nesting birds or bats.

The works are required to ensure the longevity of the existing building. If the existing roof covering and structure is were not improved upon, then it will decline further and become a safety risk. This would also result in the potential loss of a characterful building.
